Time for Gold Silver Time

The 16th Gold Silver Time International Jewellery and Watch Fair begins this Thursday, 1 October at the MT Polska Centre. GST is a very special business and cultural event, where 170 exhibitors will showcase what's new in jewellery for the autumn and winter season.

As usual, jewellery trends remain the focus. There are always a number of such noticeable trends; one, however, is clearly the most important: there is a growing fashion for wearing high quality, high value and timeless jewellery. Here Gold Silver Time has a lot to offer both in terms of gold and silver products made with traditional and cutting-edge techniques and in the field of art and designer jewellery, which by its very nature is marked with the individualism that is so en vogue today.

This trend, which includes "tailor made" and handmade products also embraces the work of artists and craftspeople such as jewellers, engravers, watchmakers, shoemakers, carpenters and bookbinders that will be showcased at the stand of the Polish Handicraft Guild. These are largely endangered professions. However, there is hope that they can survive when they are rediscovered by young people looking for true values.

The unique jewellery on display will be complemented by contemporary jewellery art exhibitions: the post-competition *Presentations* and *Master of Gold, Silver, Time and 3D Space*, and the conceptual *SILVER* and *From Ornament to Message* that highlight artistic expression.

Gold Silver Time is the most important autumn exhibition for the jewellery business to take place in Warsaw. This year's GST will have 170 exhibitors who will showcase what's new for the autumn and winter season in gold, silver, designer and fashion jewellery and gemstones. The event has an attractive framework agenda with exhibitions, conferences and seminars.
